

Halloween Stickers

LARGE STICKERS · US LETTER
Print at 100%, then cut along the gray lines

1 inch

Not 1 inch? Print at 100% (Actual Size), not Fit to page.

Halloween Stickers

30 SMALL STICKERS · US LETTER

Print at 100%, then cut along the gray lines

Print and Cut Notes

Pages 1 and 2 are the sticker sheets, so you only need to print those two pages. This page explains how to print them at the right size, cut them out and change them in Canva.

Print

- 1 Choose US Letter as the paper size and set the scale to 100% or "Actual Size". "Fit to page" shrinks every sticker.
- 2 Set the paper type to the closest match for your sticker paper, such as Label, Photo or Heavyweight.
- 3 Print page 1 on plain paper first and check that the square measures 1 inch.
- 4 Use inkjet sticker paper in an inkjet printer and laser sticker paper in a laser printer.
- 5 Let inkjet prints dry for a few minutes before you cut, so the ink doesn't smudge.

Cut

- Rough-cut each sticker out of the sheet, then trim along its gray line. The line leaves a margin of white paper, so a slightly wobbly cut still looks neat.
- For a shaped sticker, cut loosely around the dark outline instead and leave a thin white edge.
- These sheets are made for scissors. They don't include registration marks for cutting machines.

Edit in Canva

- Every sticker is a separate image, so you can move, resize, swap or delete it.
- The gray cut line is a separate shape. Select a sticker and its line together and group them before you move them.
- To add your own art, upload a transparent PNG, delete a sticker and place yours inside the empty gray line.
- Download your copy as PDF Print and print it at 100%.

Using These Stickers

You can print and use these stickers for yourself, your family, your classroom, party favors and gifts. Please don't sell the artwork or the sheets, or post the files somewhere else as a download. Link to the article instead.
